

Apartment House Mailboxes. We've been doing it right since 1948.

<http://academymailbox.com/mailbox>

Academy sells, installs and repairs more Apartment House Mailboxes than all of our competitors combined.

We wrote the book on today's modern Package Delivery Centers, which is now a requirement for new construction and major renovation. Requirements now include high security incoming/outgoing mailboxes and parcel lockers (for large packages) in every new installation.

Doing the correct job also includes getting your new installation approved by the USPS and mail delivery resumed. Because we're on the cutting edge and know how to get through the "red tape" of the USPS, we get your Delivery Center into service rapidly and correctly.

Humberto "Tito" Mardirossian has been in charge of Academy's Mailbox Department for the past 30 years.

To schedule an appointment for an on-site visit with Tito, please contact him at tito@academymailbox.com or at (718) 539-1000 ext. 113.
